## ABOUT US

PRATAPS Civil & Asphalt Quarries Ltd (PCAQL) is a 100% owned Fijian company, that has been in the business of road paving, sealing, and rock quarrying since 1977. Before this, the company was recognized as an earthmoving contractor, moving up to Civil Engineering Contractors and expanding into the building sector.

Moreover, PCAQL supplies all kinds & sizes of sealing and concrete aggregates. Recently partnering with the landowners of Matadraga, Vuda to produce good quality Aggregates and pavement materials. It also has its own machinery and technical team to deliver, with quality assurance on any projects taken up.

With having over 40 years of experience in the above nature of works, PCAQL always strives to hold highest standard of quality deliverance on its work. Thus, not only does it have a past of delivering quality finished projects on time, but the company also has a vision of employing and increasing the skillfulness of Fijians to specialize in different skills it undertakes in this industry.

## LIST OF MAJOR PROJECTS BY PCAQL

| YEAR | DESCRIPTION                                                                                                                                                                                                                                                                                                                                |

## ORGANISATION CHART

## **OHS COMPLIANCE**

We confirm that as a company, we are OHS Complaint.

Prataps has an OHS committee as per Labour requirements.

PCAQL complies with National OHS Department Reg SN/92.

PCAQL has an active OHS committee.

PCAQL has a Public Liability Insurance of FJD 1.0 million Policy Number PLP002318.

PCAQL has a Valid ACCF insurance under the FNU levy.

## **SAFETY MANAGEMENT PLAN**

### **Workmen**

All employees have site induction briefing on the safety of themselves and other persons as per Prataps Safe Work Method Statement (SWMS). Safe work methods Statement caters for but is not limited to - a tidy workplace, avoiding the creation of conditions which may cause accidents and injury, being aware of moving equipment and vehicles, and appropriate, reflective vests to be worn by workers in the vicinity of vehicles and earthmoving machinery, keep clear of plant and vehicles especially swinging excavators and reversing plant, remain within view of operators.

### **Work Methods**

Arrange and carry out work to avoid creating hazardous situations, keep work areas tidy and free from debris, ensure excavations are stable, warning tape to open excavations, and suppress dust.

### **Site Traffic**

Drivers to be briefed on safety issues such as careful lookout for workers and other vehicles and plant, 20km/hr. maximum speed on-site, ensure clear behind before reversing, ensure good visibility, and serviceable rear-view mirrors.

### **Public Road Traffic**

Be aware that the frontage of the site has heavy traffic flows times, place and maintain CONSTRUCTION VEHICLES CROSSING PLEASE DRIVE SLOWLY signs and cones during working hours, at appropriate times ensure properly equipped flagman in place to control traffic on and off site.

### **Other Contractors**

All visitors on site have to go through OHS induction and Prataps SWMS. When other contractors come to the site make provision for safe access to and from their respective work areas, brief their supervisors as to access routes “no go” areas, make aware of dangers associated with earthmoving plant and heavy vehicles. Note that other contractors will be expected to control their own vehicles at the main road.

### **Existing Services**

All relevant authorities are informed by fax of the civil works carried out on site. They have been requested to notify us of any existing services on the site that might be damaged during construction.

## **HEALTH AND SAFETY AT WORK POLICY**

- PRATAPS Civil Asphalt Quarries PTE Ltd is committed to provide and maintain a safe work place and healthy working conditions and environment for all employees, associates and clients.
- As part of his commitment, it is our responsibility to eliminate accidents that may cause death or permanent disability and to minimize the detrimental effects of construction on the surrounding land and water systems.
- Consultancy team members and subcontractors are to comply with all requirements placed on them by PCAQL in regards to OHS and together combat any problems as they arise before and during construction.
- All workers are to be properly versed and responsive to health and safety at work.
- All employees are to ensure safety for him/ her, safety of fellow workers, and that of the General public.
- Any areas of the project that do not conform to this policy will be deemed unsafe and work will be stopped immediately by any member of the PCAQL site management team.

## **ROAD AND AIRPORT CONSTRUCTION & MAINTENANCE EXPERIENCE**

PRATAPS Civil & Asphalt Quarries Limited has been involved in major road works and maintenance since 2001 for rural and urban networks. From construction of Runways, Airports major highways to cane access road construction and upgrade works including surface, sealing asphalt and underground stormwater, water, sewer reticulation, including road furniture etc.

## **SEWER AND SANITARY**

PRATAPS Civil & Asphalt Quarries Limited is well vested in constructing a sewer reticulation and has completed various rising main and gravity sewer reticulation including sewer pump station construction and installation.

## **WATER RETICULATION**

PRATAPS Civil & Asphalt Quarries Limited has completed various required water reticulations for subdivisions and others including pressure testing for all size pipes including fittings Sluice valves, Fire Hydrants, Trenching, Bulk earthworks, and lot connections.

## **INFRASTRUCTURE AND OTHER SUPPORT**

Our Organization PCAQL is a Civil Engineering Works Contractor. We have in our organization, apart from the Management Staff; there is a Financial, and technical Team that is responsible for civil engineering activities, Support services Team responsible for the maintenance of working Plant and Equipment both “on-site” and “off-site”. The Quarry activities and Asphalt Plant operation is managed by the Quarry Team. We also have Consulting Engineers and other sub-contractors “on-call” to supplement and assist us with our operations wherever/whenever the need arises. Besides that, we are also Earthmoving Contractors, and general cargo carriers.

We have sited on location both “fixed” and “portable” Stone Crushing Plants and we crush and sell all sizes of road sealing, and concrete aggregates from rocks and river gravel sources. We also possess a “state-of-the-art” modern Asphalt Plant where we process and sell asphalt for other Contractors. We have three Bitumen Lorry Tankers for sealing works in addition to other road working machines (3nos Asphalt Paving machines, wheeled rollers, water carts, motor graders, bulldozers, dumper Lorries, and tip trucks as well as earthmoving plants and equipment.

Our Headquarters is located at Waqadra, Nadi. Apart from the above equipment, we also own our Geotech Laboratory for materials testing as well as quality controls.

## **INSTITUTIONAL STRENGTHENING AND SKILL UPGRADING**

### ***Training and Development programme for locally recruited staff***

Ministry of Mineral resources have been providing training to our staff in relevance to quarry works and safety regulations as well as quality control. The company relies on their supervisors and engineers to provide the workmen with the practical skills and technical knowledge in pursuant to Australia and NZ standards to achieve the best results.

The General Manager, Rahul Pratap holds a master's degree in Pavement engineering Technology with a minimum 23years experience. He is a registered chartered professional engineer with the Australian Institute of Engineers.

### ***Managing emergency responses in a Road network maintenance context***

Prataps team has received training in the basic first aid course and have licensed quarrymen under the Ministry of Mineral Resources. Several other more experienced staff will be provided with training across the year. A safety committee is active within the company who regular sit to discuss associative matters.

### ***Improving the quality management of construction and maintenance***

- a) Prataps always strive towards obtaining the required Quality Management System relevant to be practiced by Contractors. The practiced quality management system adopted at workplaces varies for different Operators, Manufacturers and suppliers and is designed to suit specific needs. The special conditions laid down in the Specifications and General Conditions of the Tender documents may have been drawn up in accordance with the Client's Quality Management System guidelines to dictate procedures.
- c) For our purpose, the quality management system during this work will be guided by the Project's Contractual Documents as well as the Client's specific working requirements. We will monitor progress against targets, hold our weekly progress meet, and engage our consultant to carry out his independent inspection's) We have a Geotech laboratory in our Waqadra yard

and we will carry out our own material testing to ensure the products supplied are in accordance with specifications. This lab was established in 2010 and is capable of carrying out the following tests: Sampling test, DCP, CBR, grading, PI, lab compaction, NDG, moisture, L/A, ALD, concrete (NDT), coring asphalt and concrete, marshal test, bitumen extraction.

### ***Managing industrial relations and employment conditions***

The operations manager and directors have hands-on experience with the management of employees and their working conditions. A safety committee exists within the company and includes the director as a member.

### ***Resourcing of road network maintenance activities in Fiji***

Our directors and operations manager are highly experienced and fully capable of recognizing the resource requirements of all our road maintenance projects. Manpower, machinery and materials are the three main resources that are considered for any project with the logistics planning.

### ***Effective use of local sub- contractors***

PRATAPS Civil & Asphalt Quarries Limited has previously used sub-contractor for specialized works such as building works, concrete pavements, kerbs and channel and electrical and plumbing works. Our company previously had also sub contracted Gideon (NZ) on a road project for pavement stabilization works, Blacktop (NZ) on the Nadi International Airport runway touchdown zone asphalt repairs. The succession plan in place has resulted in upskilled local capacity in technical deliverance.

## **CLIENT SERVICE PLAN**

PCAQL has always as a service business (civil contractor) placed importance to “making a first impression”. This attitude has prompted us to maintain with improvement our service towards our customers. FAL has been one, we believe, those satisfied clients continuing doing business.

Our proposed Customer Service Plan for this special project will be based on the Client’s requirements and will encompass the following: -

- **Paying attention to details** - little things make a big difference. We will strive to maintain strict control on our activities and quality. This is in view of the “timings” of the work. We know to work

at night in the cover of darkness is always a challenge so our planning has to be very effective. Required materials will be of the standard specified.

- **Develop strong leadership:** - Hire and keep quality employees to ensure there is top quality service. We will provide training which supports PCAQL strategic objectives and create a service-driven culture throughout the workers.
- **Utilize innovative technology to support customer service.**  
It is our intention if available, to use the best practice method of accomplishing the Project. We will Benchmark company-service standards against the best practices of service leaders and competitors.
- Continuously evaluate progress, make adjustments and strive for excellence.
- Regular meetings/Client to ensure user feedbacks. We will also prepare reports on work progress.
- Strategies to be used will be to involve our consultants and regular contacts with materials suppliers, our in-house progress meetings and special emphasis to strict supervision.
- OTHER Customer service orientated proposals to enhance our bid are: - Expertise of our staff (management skills)  
Disciplined work force “on-time” delivery of completed sections
- Maintain quality and on time deliverance with client’s budget.

## **OHS COMPLIANCE**

PCAQL complies with National OHS Department Reg SN/92.

PCAQL has an active OHS committee.

PCAQL has a Public Liability Insurance of FJD 1.0 million Policy Number PLP002318.

PCAQL has a Valid ACCF insurance under the FNU levy.

## **SAFETY MANAGEMENT PLAN**

### **Workmen**

All employees have site induction briefing on the safety of themselves and other persons as per Prataps Safe Work Method Statement (SWMS). Safe work methods Statement caters for but not limited to - a tidy workplace, avoiding the creation of conditions that may cause accidents and injury, being aware of moving equipment and vehicles, and appropriate, reflective vests to be worn by

workers in the vicinity of vehicles and earthmoving machinery, keep clear of plant and vehicles especially swinging excavators and reversing plant, remain within view of operators.

### **Work Methods**

Arrange and carry out work to avoid creating hazardous situations, keep work areas tidy and free from debris, ensure excavations are stable, warning tape to open excavations and suppress dust.

### **Site Traffic**

Drivers are to be briefed on safety issues such as careful lookout for workers and other vehicles and plants, 15km/hr. maximum speed on-site, ensure clear behind before reversing, ensure good visibility, and serviceable rear-view mirrors.

### **Public Road Traffic**

Be aware that the frontage of the site has heavy traffic flows times, place and maintain CONSTRUCTION VEHICLES CROSSING PLEASE DRIVE SLOWLY signs and cones during working hours, at appropriate times ensure properly equipped flagman in place to control traffic on and off-site.

### **Other Contractors**

All visitors on site have to go through OHS induction and Prataps SWMS. When other contractors come to site make provision for safe access to and from their respective work areas, brief their supervisors as to access routes “no go” areas, make aware of dangers.

associated with earthmoving plant and heavy vehicles. Note that other contractors will be expected to control their own vehicles at the main road.

### **Existing Services**

All relevant authorities are informed by email and/or Direct communication of the civil works **carried** out on site. They will be requested to notify us of any existing services on the site that may get damaged during construction.
